DEMAND THE BEST IN AUXILIARY POWER

The Universal Atomic 4 and Atomic Stevedore are 100% marine auxiliary engines. Designed. engineered, and built primarily for powering the world's finest sailboats. Engines that will give you stamina, service, and reliability, the Atomics are the recognized leaders in their field. They measure up to the critical standards of leading architects, designers, custom and stock boat-builders, and thousands of discriminating sailors the world over.

Each Atomic 4 and Atomic Stevedore is meticulously custom built, and each engine receives a comprehensive dynamometer test run to insure its operational excellence after installation.

A thermostatically controlled water by-pass system provides quick engine warm up and immediate overboard water to maintain a cool exhaust system.

Available in direct, reduction, and V-drive models, the Atomic 4 and Atomic Stevedore fit the most limited engine space.

So demand the best in auxiliary power ... Universal ATOMICS... the time-proven **U.S.** built engines you can depend upon. Ask any Universal owner.

COMPLIES WITH CURRENT U.S.C.G. REGULATIONS

FEATURES ATOMIC 4 AND STEVEDORE

STANDARD EQUIPMENT Propeller coupling, hand sump pump, U.S.C.G. approved frame arrestor, lifting ring, water pump, mechanical fuel pump with hand primer, oil level gauge, crankcase breather, built-in reversing gear, automatic temperature control, instruction manual, threaded exhaust flange, shift lever, and one year limited-warranty.

CYLINDER Cast en-block with crankcase of marine chrome nickel alloy iron. Full length water jackets.

CYLINDER HEAD Marine chrome nickel **alloy** iron. Head is detachable. Combustion chamber designed to obtain maximum power and economy from regular grade gasoline.

CRANKSHAFT High carbon steel. Fully **counter**weighted. statically and dynamically balanced for smooth operating. Has insert bearings.

CONNECTING RODS Drop forged, high carbon steel. insert bearings, and floating type piston pin.

OIL PAN One piece true marine type extending the full length of engine provides extreme rigidity.

MANIFOLD Water jacketed exhaust and intake manifold incorporated into one casting. Exhaust flange tapped 1 1/4 " I.P.S.

LUBRICATION Full pressure to main, connecting rod. idler gear stud, and camshaft bearings. Outside **oil** pressure adjustment. Large area oil suction screen.

HAND SUMP **PUMP Separate**, for easy removal of crankcase oil.

WATER JACKET COVER Removable clean out and water distributing plate on the side of cylinder block.

COOLING Rubber impeller water circulating pump standard. Water pump inlet $\frac{3}{8}$ I.P.S.

REVERSING GEAR Oversize ball bearing type. pressure lubricated. Large radial end thrust ball bearing for propeller thrust.

REDUCTION GEAR Single step. internal helical and pinion type. Available in 2 to 1 ratio.

CARBURETOR Updraft Zenith marine safety non-drip type with upturned air horn. fitted with Zenith U.S.C.G. approved type flame arrestor and vacuum crankcase ventilator.

ELECTRICAL SYSTEM 12 volt system standard. 37 amp alternator, marine type. Transistorized voltage regulator. Starter equipped with solenoid for remote starting. Distributor has full automatic advance.

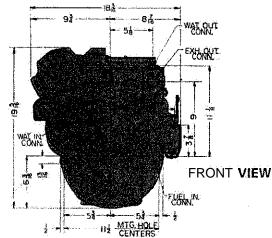

PROPELLER ROTATION Right hand propeller.

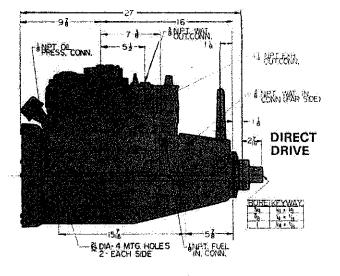

AUTOMATIC TEMPERATURE CONTROL Automatic by-pass type to assure efficient operating temperature.

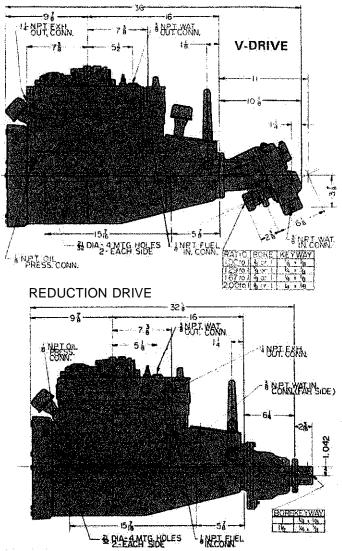

OPTIONS ATOMIC 4 AND STEVEDORE

Instrument panel, power take-off pulley on flywheel. on-board spare parts kit. hand starting crank. 55 ampere alternator, adjustable rubber mounts.

INSTALLATION DIMENSIONS ATOMIC 4 AND STEVEDORE
