

# PARTS DEPARTMENT BULLETIN

DATE: 23-Mar-15

BULLETIN NUMBER: 2015-3

SUBJECT: 72 amp alternator PN 300746 is no longer available.

DETAIL: Effective immediately, the 72 amp alternator option for certain Westerbeke and Universal diesel engines has changed to a 65 amp alternator. The applications and price remain the same.

Although the technical maximum output rating is 65 amps, it's important to note that the new alternator will actually produce more charging output at typical engine operating speeds than the 72 amp model does. The 65 amp uses a different cooling fan compared to the 72 amp model but the case size, mounting points and wiring interface is identical, so it's completely interchangeable in the field.

The part number for the 65 amp alternator is 056095. The 72 amp alternator part number 300746 will be superseded to the 65 amp alternator part number 056095. Also, the 65 amp alternator will replace the 72 amp alternator in alternator kit part number 256938.
